

Stanley Wastewater Project

1 The new **Wastewater Treatment Facility and Septic Truck Receiving Station** will expand the waste capacity throughout the Municipality, allowing developments to continue.

2 Stanley's new **forcemain conveyance system** will be sized to accommodate new developments and existing communities in the area.

3 The **Stanley Corridor** is an attractive location for commercial growth and requires increased wastewater capacity to continue to develop.

4 **Rosebrook** is one community that will gain additional waste management capacity to allow for growth. The project will provide the services required by new housing development.

5 The existing communities of **Reinfeld and Schanzenfeld** will be given the option of connecting to the wastewater system.
